

Acing the College Admissions Process

The college admissions process is a rigorous one. It can be stressful for students and parents alike. However, with better knowledge, understanding, and planning, this journey can be made more manageable and consequently conquered.

I would like to share my expertise with you and bring you my unique approach to college application process. It is one that seeks to build on my own personal experience, accumulated understanding of the system, and how it works, my personal connections, and other strategies. My goal is to share my knowledge with you and put it to work, achieving your student and family's aims. I know how this might feel because I have been there again and again, wanting success for students and families alike. I am ready to help you learn how to navigate this rigorous process so you do not have to go through it alone.

I offer two consecutive seminars about this topic at your Community Center:

- **Understanding the Basics of the College Admission Process – 2/18/2017**
- **Choosing a Way in the College Admission Process – 2/25/2017**

The workshops will run from 2:00-3:30 PM with an about 45 minutes talk followed by Q and A session.

This workshop is recommended to all parents and students currently at high school in grades 9-11. It is advisable that 8th grade parents will also attend. **Let's do it together!**
