

What India means to me ...

By Shashank Salgam

When I think of India, I think of spicy food and many different spices. I think of the many peoples and languages that live in this land. I think of the mountains, rivers, forests, deserts, plains, hills and islands. I think of the rich culture of the people. I think of the conflict and religious divide and the unity and nationalism. I think of how all Indians have a common goal: to be a united India.
